ProStor Systems Names Vice President of Marketing

Tape Industry Veteran Joins ProStor Systems Executive Team

BOULDER, CO – March 14, 2006 – ProStor Systems today announced the appointment of a recognized storage industry veteran, Rick Luttrall, as vice president of marketing, reporting directly to CEO and President Steve Georgis. Luttrall is a well known backup/data protection industry leader who has played pivotal strategic marketing and technical roles for some of the most established names in the industry, including Compaq, Dell and Hewlett-Packard.

“We are delighted that Rick, who spent the last 25 years defending the value of tape backup solutions, has joined ProStor Systems to help us launch our tape replacement products,” said CEO Steve Georgis. “His depth of industry knowledge, coupled with his more than 20-year track record of successfully developing and introducing products into the highly competitive storage arena, will be a tremendous asset as we market and sell our new RDX™ removable disk cartridge technology.”

Luttrall joins ProStor from Hewlett-Packard where he was chief technical strategist of the data protection and recovery solutions group. There he led a number of key HP storage initiatives as well as represented HP in the technical and customer communities. Luttrall directed the teams that developed HP’s first intelligent tape library controller; the One button Backup Recovery Solution; and the industry’s first storage area network backup solution.

-more-

"Anyone who wants to compete effectively against tape in the data protection market needs leadership that understands the important role that tape has played in this segment," said Robert Amatruda, research manager for Tape Research at IDC. "Rick brings a wealth of experience in both the benefits and challenges of tape solutions, which will be invaluable to ProStor Systems," he added.

Prior to working for HP, Luttrall was director of product marketing and program management for Crossroads, where his team closed the very profitable Compaq, HP and STK OEM business. Before that, Luttrall defined and launched PowerVault™ tape solutions as senior product marketing manager at Dell Computer. He spent four years at Compaq, defining Compaq's enterprise storage strategy and launching Compaq's storage products. Preceding his years at Compaq, Luttrall held several marketing management positions at Conner Peripherals. He started his career as an engineer, and earned two patent awards on optical storage technology.

Founded in May 2004, ProStor Systems develops, manufactures and markets RDX™ technology, the industry's first removable disk cartridge technology to replace tape storage for backup, disaster recovery and archive applications. RDX™ technology brings enterprise-class reliability and data protection to servers, networks and professional workstations at an affordable price. ProStor Systems is venture funded by New Enterprise Associates (NEA), Boulder Ventures and Western Technology Investment. The company is headquartered at 5555 Central Ave., Suite 100, Boulder, CO 80301.
