ProStor Systems Unveils New InfiniVault Archive Appliance And Wraps Up Week of New Product and Partner Announcements

BOULDER, Colo. – Oct. 15, 2007 – ProStor Systems, a leading developer of removable disk storage solutions, today unveiled its new InfiniVault™ archive appliance for the first time at *Storage Networking World* at the Gaylord Texan Resort in Dallas. The company also announced a strategic relationship with Microsoft and a software partnership with Quest, a leader in e-mail archiving.

Over the past week, ProStor Systems made several key announcements including the introduction of the world's first removable disk archive system for small and medium enterprises; third-party test results that demonstrate that RDX® removable disk technology has an archive life of at least 30 years; the company's new ProAlliance™ Partner Program for qualified resellers; full software compatibility support from leading ISVs; and a new strategic relationship with Microsoft.

The new InfiniVault archive appliance integrates ProStor's Archive and Compliance Engine (ACE) with three tiers of storage (online, nearline and offline) providing small and mid-sized enterprises (SMEs) with an archiving solution that delivers a fast, secure and reliable archival storage platform for long-term data preservation, regulatory compliance, and e-discovery in a single system. By leveraging RDX removable disk technology, ProStor has created an easy-to-deploy archiving

InfiniVault Launch Highlights Busy Week for ProStor

solution that combines the performance and rapid retrieval of fixed-disk archive solutions with the unlimited capacity, scalability and disaster recovery protection of removable disk media, in an all-in-one design that is far more reliable than tape and much lower cost than fixed-disk archive systems.

“Our research shows that SMEs have the same archive and compliance requirements as large enterprises, but don’t have the budgets to afford enterprise solutions or the resources to manage complex solutions,” said Steve Georgis, CEO and president of ProStor Systems. “The InfiniVault archive appliance provides those enterprises with the same level of data preservation and compliance without the complexity and high price tag.”

The entire InfiniVault archive appliance product suite is sold through a network of high-value resellers in North American, and will be generally available in the first quarter of 2008. The InfiniVault is being shown in Booth # C-7 at SNW from Oct. 15-18.

About ProStor Systems

ProStor Systems is the leader in enterprise-class removable disk storage for data backup and long-term archive. Designed to replace tape, RDX removable disk products provide the performance and reliability of disk while preserving the removability and archival benefits of tape. More than 35,000 RDX units have been installed to date. ProStor has introduced InfiniVault, the world’s first removable disk archive system. Targeted at small and mid-sized enterprises with limited budgets, InfiniVault provides low-cost, long-term data preservation in an intelligent regulatory-compliant appliance based on RDX technology. ProStor was recently named to the Byte and Switch Top 10 Startups to Watch List.
